

PA13-SERIES PACKAGED AIR CONDITIONERS

Cooling Capacities: 23,000 to 56,500

SEER: 13.0

GREEN REFRIGERANT R-410A

BACK (OUTDOOR AIRFLOW) END OF UNIT

FRONT (INDOOR AIRFLOW) END OF UNIT

Standard Engineered Features

Air Conditioner Compressor:

Reciprocating compressors with crankcase heaters are standard on 2, 2½ and 3-ton models. Scroll compressors are used on all other models and no crankcase heaters are required.

R-410A Refrigerant:

Designed with R-410A (HFC) non-ozone depleting refrigerant in compliance with the Montreal protocol and 2010 EPA requirements.

ECM Indoor Blower Motor:

Features an electronically commutated motor providing super-high efficiency, low sound levels and soft-start capabilities. The motor is self-adjusting to provide the proper airflow rate for a broad range of static pressure in ducted installations without user adjustment or wiring changes.

Aluminum Finned Copper Coils:

Grooved tubing and enhanced louvered fin for maximum heat transfer and energy efficiency.

Outdoor coil is constructed with special corrosion resistant hydrophilic fin stock with 2-layer coating. (1st layer - blue acrylic primer; 2nd layer - clear topcoat.)

Thermal Expansion Valves:

Models with reciprocating compressors have bleed TXV, models with scroll compressor have non-bleed TXV.

Discharge Muffler:

Standard on 2½ and 3-ton models.

Liquid Line Filter Drier:

Protects system against moisture.

Compressor Control Module:

Built-in off-delay timer adjustable from 30 seconds to 5 minutes. 2-minute on-delay if power interrupt. 120-second bypass for low pressure control, and both soft and manual lockouts for high and low pressure controls. Alarm output for alarm relay.

Phase Rotation Monitor:

Standard on all 3-phase models. Protects against reverse rotation if power supply is not properly connected.

High & Low Pressure Switches are Auto-Reset

Built-in lockout circuit resets from the room thermostat. Provides commercial quality protection to the compressor.

Pre-Painted 20 Gauge Zinc Coated Steel Cabinet:

Cleaned, rinsed, sealed and dried before the polyurethane primer is applied. The cabinet is handsomely finished with a baked on textured enamel, which allows it to withstand 1000 hours of salt spray tests per ASTM B117-03.

Pre-Painted 16 Gauge Zinc Coated Unit Base:

The unit base is treated with the same paint coatings as the cabinet above, insuring years of service.

Top Discharge Outdoor Fan:

Efficiently moves air quietly for effective heat exchange.

Electrical Components & Controls:

Readily accessible for easier service.

Field Installed Accessories

Optional Field Installed Electric Heat Strips:

With automatic limit and thermal cutoff.

- Field installed heater package for all models.
- Features slide-in field assembly with various BTUH outputs.
- Permits stocking of only one unit.

Optional Field Installed Low Ambient Control:

Cycles outdoor fan motor below 55°F outdoor temperature to maintain acceptable condensing pressure.

① ECM = Electronically Commutated Motor

② Maximum time delay fuse or HACR type circuit breaker for protection of field wiring devices.

③ Based on 75°C copper wire. All wiring must conform to the National Electrical Code and all local codes.

④ These "Minimum Circuit Ampacity" values are to be used for sizing the field power conductors. Refer to National Electric Code (latest revision), Article 310 for power conductor sizing.

① Motor will deliver consistent CFM through voltage supply range with no deterioration (197-253V for all 230/208V models).

② Continuous CFM is the total air being circulated during continuous (manual fan) mode.

③ Will occur automatically with a call for "Y" for cooling mode operation.

④ Will occur automatically with a call for "W1" for heating mode operation.

Optional Field Installed Electric Heater Packages

Optional field-installed electric heater packages are available for 5 through 15Kw capacities. The heater packages are UL listed to be field-installed into the basic unit. They feature prewired control circuit wiring with plug-in connector. Simply slide the heater into the unit, plug in the pretested control circuit and connect the separate high voltage circuit wiring.

IMPORTANT: While this electrical data is presented as a guide, it is important to electrically connect properly sized fuses and conductor wires in accordance with the National Electrical Code and all existing local codes.

Optional Field Installed Heater Packages Are Only To Be Used With The Models As Indicated Below

Optional Control Modules — Field Installed

Field Installed Part	Applicable To	Description
CMA-28	All Models	Low Ambient Control
CMC-15	All -A Models	Compressor Start Kit

Optional Equipment — Roof Hood

- Shipped knocked down
- Polyester baked enamel galvanneal cabinet
- Heavy insulation - 1/2 inch
- Built-in filter
- Fresh air damper assembly provides up to 15% outside air.
- **Requires prefabricated roof curb 9042-003 or 9042-004. Order separately.**

Model No.	Applicable To	Shipping Weight
RHP313-A	2, 2-1/2 and 3 ton models	110
RHP513-A	3-1/2, 4 and 5 ton models	120

† Equivalent units - Shipping

① Duct Sizing Information:

Return air dimension "C" is length / Supply air dimension "C" is length.
Return air dimension "H" is width / Supply air dimension "J" is width.

Optional Equipment — Energy Recovery Ventilator

- Assures continuous supply of fresh air and reduction of all indoor air pollutants. IAQ ASHRAE 62.1
- Provides 250 to 400 CFM (adjustable) of outside air and exhaust. Efficiencies up to 77% heating and 65% cooling.
- Designed for easy installation on roof hoods RHP313-A and RHP513-A.

Model No.	Shipping Weight
